Description

Aves VR 10W-40 is a fully synthetic, high-performance engine oil with a unique fluorescent green color formulation that reduces friction and prevents deposits. It's best for modern gasoline and passenger car diesel engines with and without turbochargers. The oil is designed for the protection and value retention of the engine during long intervals between oil changes and where there are extreme demands on the engine.

Advantages

- **Reliable Protection and High Performance:** A highly effective formula reduces friction and reliably protects the engine from wear.
- **Visual Leak Detection:** The unique fluorescent green color helps to quickly detect potential oil leaks.
- **Deposit Reduction:** Active components prevent the formation of carbon deposits and sludge, keeping the engine clean.
- **Universal Application:** Ideal for both gasoline and diesel engines, including turbocharged ones.
- **Extends Engine Life:** Designed for extreme loads and long intervals between oil changes.
