

Flushing oil

Performance Claims

Description

Superior quality flushing oil with a high content of additives ensures efficient flushing of gasoline and diesel engines. Provides high dispersant and detergent properties.

Advantages

- 1) Drain the used oil, empty (if possible) the oil filter.
- 2) Close the drain plug, return the oil filter to its place, fill in flushing oil.
- 3) Let the engine run at idle speed during 15 min.
- 4) Stop the engine.
- 5) Drain the flushing oil, remove an old oil filter.
- 6) Install a new oil filter and fill in the new engine oil.
